

Recently I was made aware that the FCC is proposing to expand Low Power FM broadcast services which could negatively affect the FM Radio station K-LOVE which I listen to all the time. K-LOVE is a positive and encouraging station which supports wholesome values and family programming. When I travel I check for K-LOVE stations on my travel itinerary. I implore you to reconsider your proposal so that my family and the other hundreds of thousands of K-LOVE listeners nationwide will continue to receive this family-friendly station in their homes and automobiles.
